## GetUpp floor sticker

If your GetUpp Assist is placed above a floor with a carpet, the sensor within the Assist might have difficulties reaching a signal. In this case, you can use the velcro sticker to place underneath your table to gain a connection.

GetUpp Assist

Step 1

Remove tape. Place device and clear space under device

Step 2

Connect to PC, docking or power supply

Step 3

INSTALL
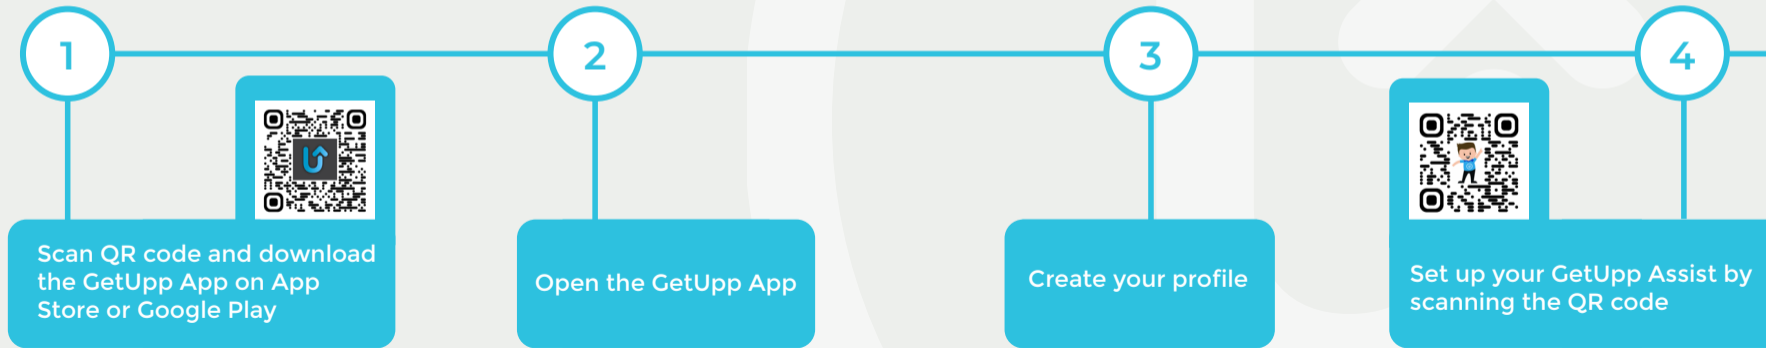

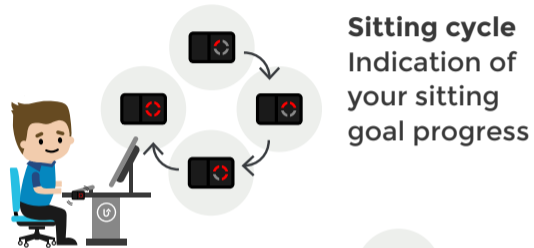

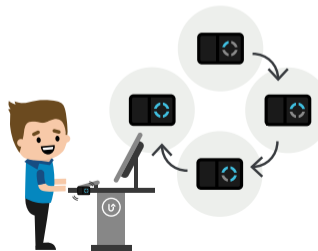

Install the app on your phone

Simply follow the steps below
